SUNDT CELEBRATES COMPLETION OF SIGNAL BUTTE WATER TREATMENT PLANT

MESA, Ariz. (November 20, 2018) – Sundt Construction, Inc. (www.sundt.com) celebrated the completion of the City of Mesa’s Signal Butte Water Treatment Plant at a dedication on Saturday. The \$103.6-million-dollar water treatment plant treats Colorado River water supplied via the Central Arizona Project canal to drinking water standards.

“Our team remained dedicated to deliver water prior to peak summer demands under a compressed schedule and worked very hard to accomplish this project in a safe and timely manner,” said **Rob Infantino**, Sundt’s project director. “The project was located in the middle of a large neighborhood, and our project team considered all of its surroundings when planning work activities.”

The project included the construction of an operations building, raw water flow control and PH adjustment facility, ballasted flocculation facilities, ozone generators, ozone contactors, deep-bed biological filtration facilities, solids residuals facilities, mechanical dewatering facilities, chemical buildings and improvements to the existing electrical building and standby power generation. Site improvements included roads, parking, drainage facilities, fencing, landscaping, and site lighting.

The 24 million-gallon-per-day (MGD) facility was built to accommodate future ultimate expansion capacity of 48 MGD. As development in southeast Mesa continues to increase, the Signal Butte Water Treatment Plant allows the City to meet its goal of a sustainable water supply well into the future.

Serving as the construction manager at risk, Sundt started work on the site in the summer of 2016. The company self-performed much of the work on the project with its own skilled craft workforce.

About Sundt

Sundt Construction, Inc. (www.sundt.com) is one of the country's largest and most respected general contractors. The 128-year-old firm specializes in transportation, industrial, building and concrete work and is owned entirely by its 2,000 employees. Sundt is distinguished by its diverse capabilities and experience, unique employee-ownership culture and depth of self-perform expertise in 13 major trades. Half of Sundt's workforce is comprised of skilled craft professionals who, together with the company's administrative employees, enable Sundt to fulfill its mission to be the most skilled builder in America. Sundt has 11 offices throughout Arizona, California, Texas and Utah and is currently ranked the country's 65th largest construction company by ENR, the industry's principal trade magazine.
